

## Aesthetics Face - Brilliant Full-Face Before and Afters

### Consistent Full Face Before and After Documentation.

Elevate your skin care consultation to a new level with powerful reports, on-screen comparisons and treatment plans.

**Aesthetics Face** combines high resolution imagery with 180 degree full face photography, and is designed to deliver outstanding, consistent photos by any user in your practice. Show your patients their progress with spot on consistent follow-up images.

Print beautiful, personalized reports to educate your patients on how your practice can enhance their aesthetics. Attract new clients and improve conversions.

**Setting the Pace in Skin Imaging Worldwide.**

## UVscan Sells Cosmetic Treatments

FotoFinder's **UVscan** software module reveals a patient's sun damage at a glance by converting digital color photos of the face into impressive monochrome images. It's simple, fast and does not require additional UV-photo equipment. Run the **UVscan** on face, neck, hand and arm photos and let the image results encourage skin rejuvenation treatments. Age spots, freckles and hyper-pigmentation are visualized dramatically—who could resist your proposals for younger looking skin?

## Easy Image Capture Process

Simply follow FotoFinder's **Guided Photography** onscreen templates and capture full face photos quickly and easily. Let FotoFinder determine the best camera settings and lighting, and receive consistent, repeatable images even when taken by inexperienced users. Every photo is automatically labeled and stored in a patient database for effortless retrieval.

## Show the Success of Your Treatments

Aesthetics Face will help make your clients aware of all your practice's treatment options and help generate more patient-driven referrals. FotoFinder's **Ghost** feature delivers consistent follow up photos to accurately track the progress of procedures. Show your clients their improvements with side-by-side comparisons and impressive procedure reports they can take home and share.

## FotoFinder Universe iPad App

Speed up the workflow in your practice with the **Universe** iPad app. The app provides image access at your fingertips in any consultation room. Comfortably sit together with your patients to review images and create a detailed treatment plan directly on the app. Review before and after images at follow-up consultations so patients can see the results for themselves. This relaxed method of consultation will motivate your patients to proceed with treatments, enhancing both conversion and compliance.
